Microglia · matched target-only TE copies · RNA and ATAC by sex

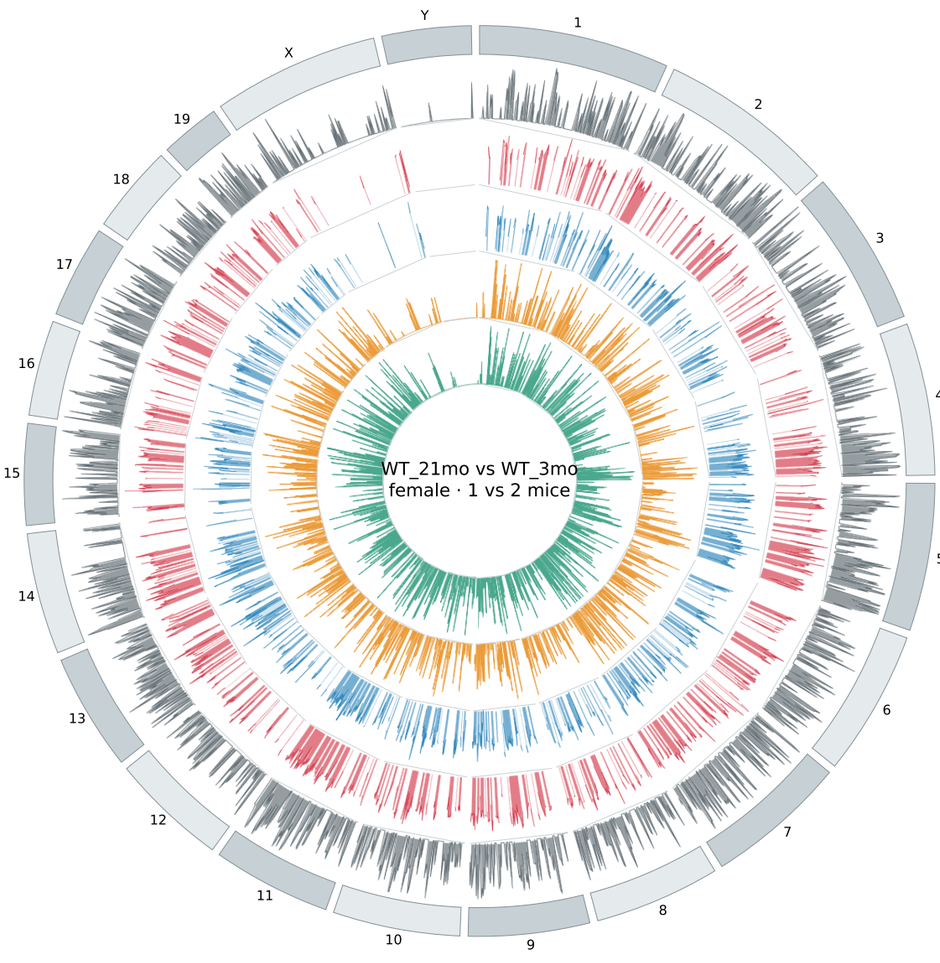

WT_6mo · female

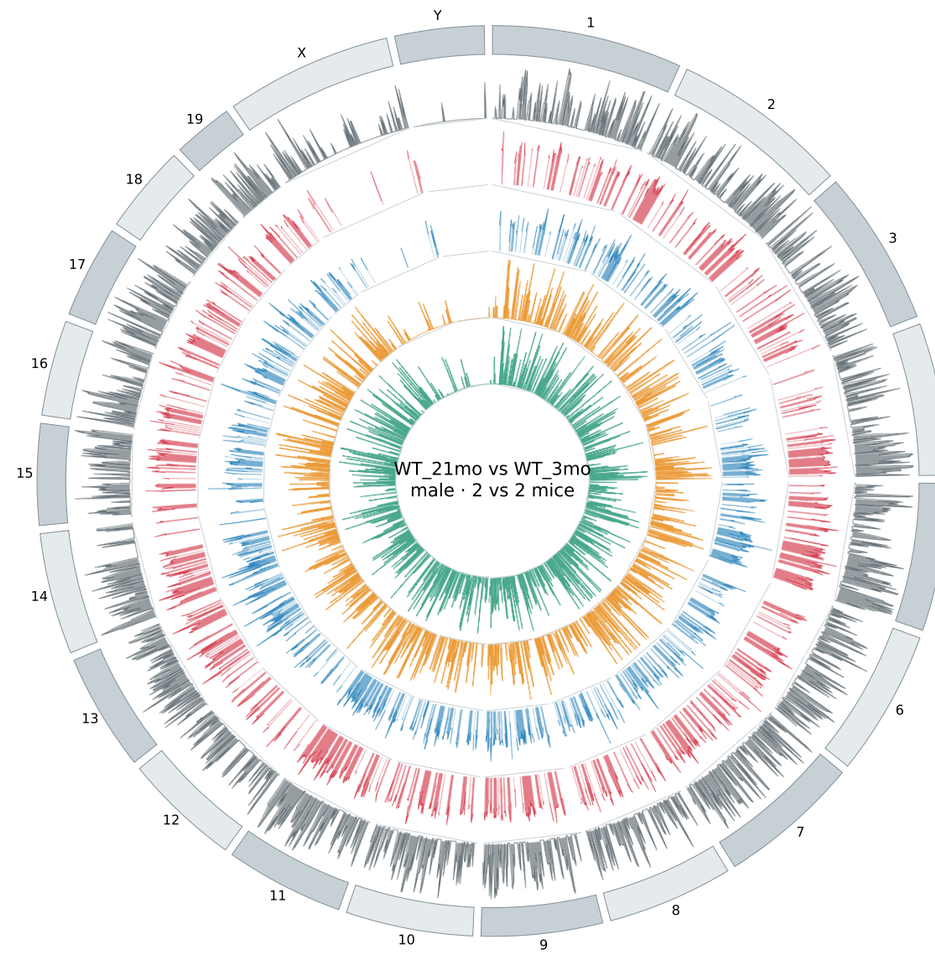

WT_6mo · male

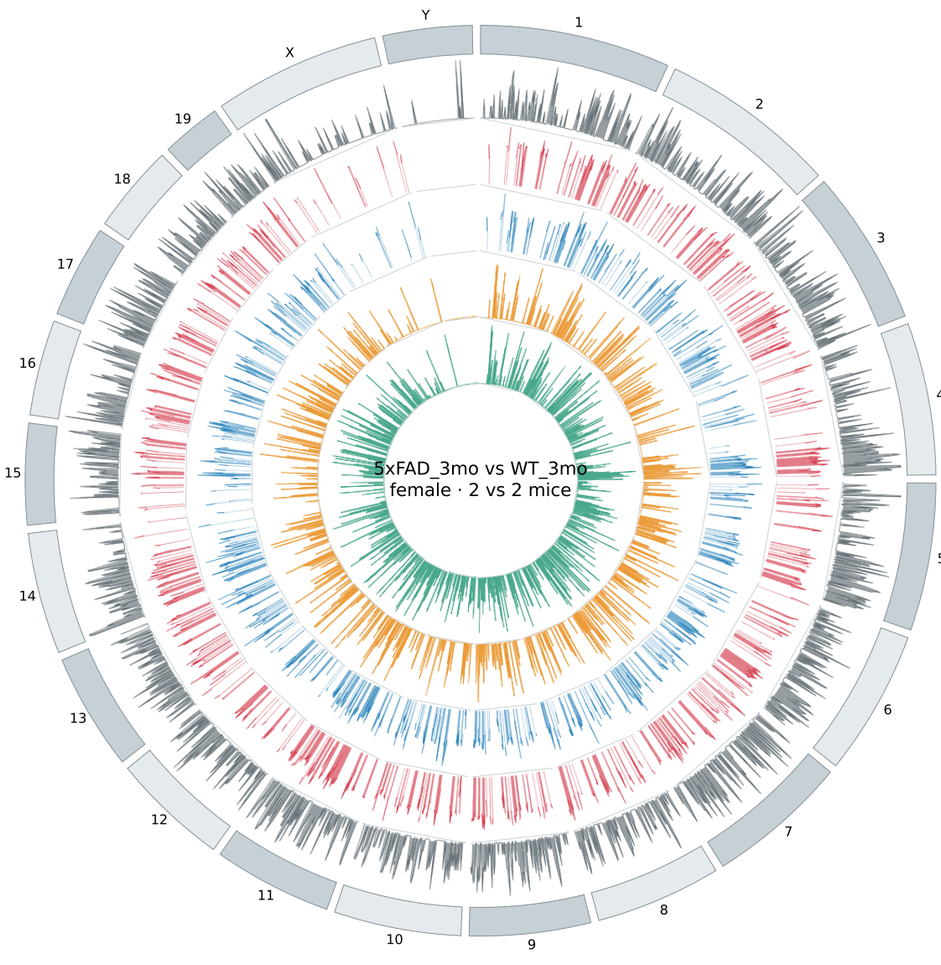

WT_21mo · female

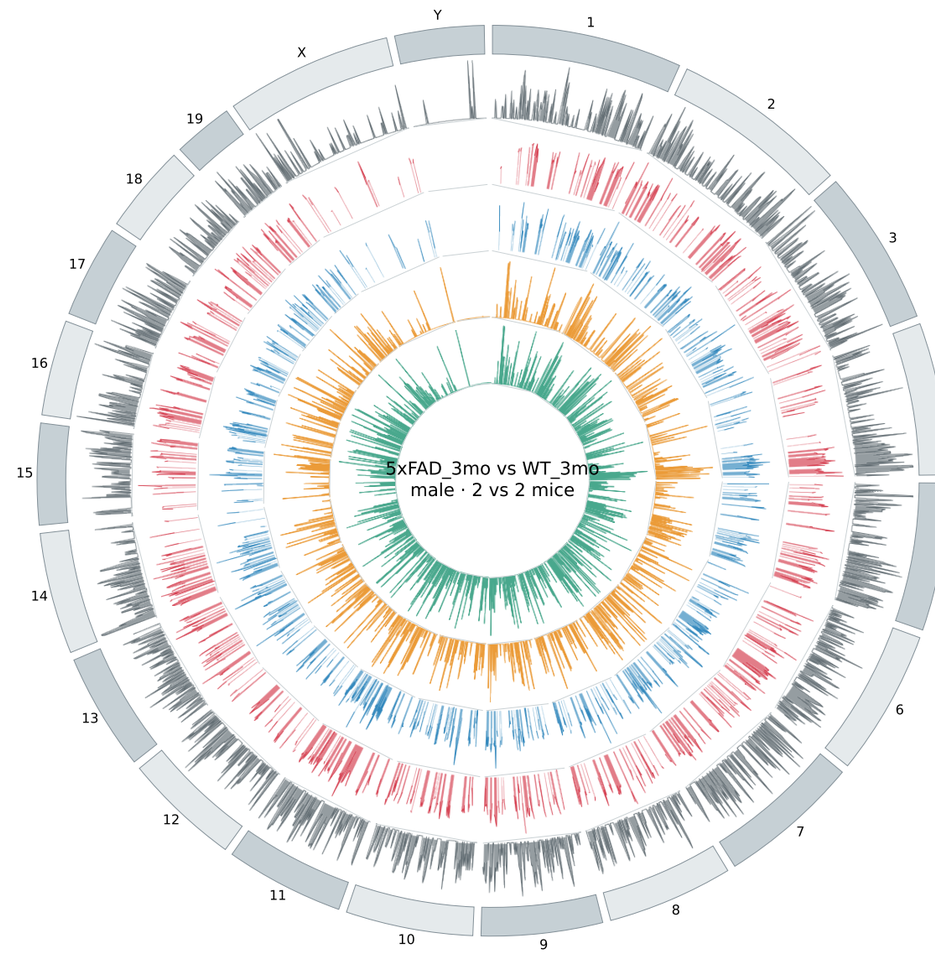

WT_21mo · male

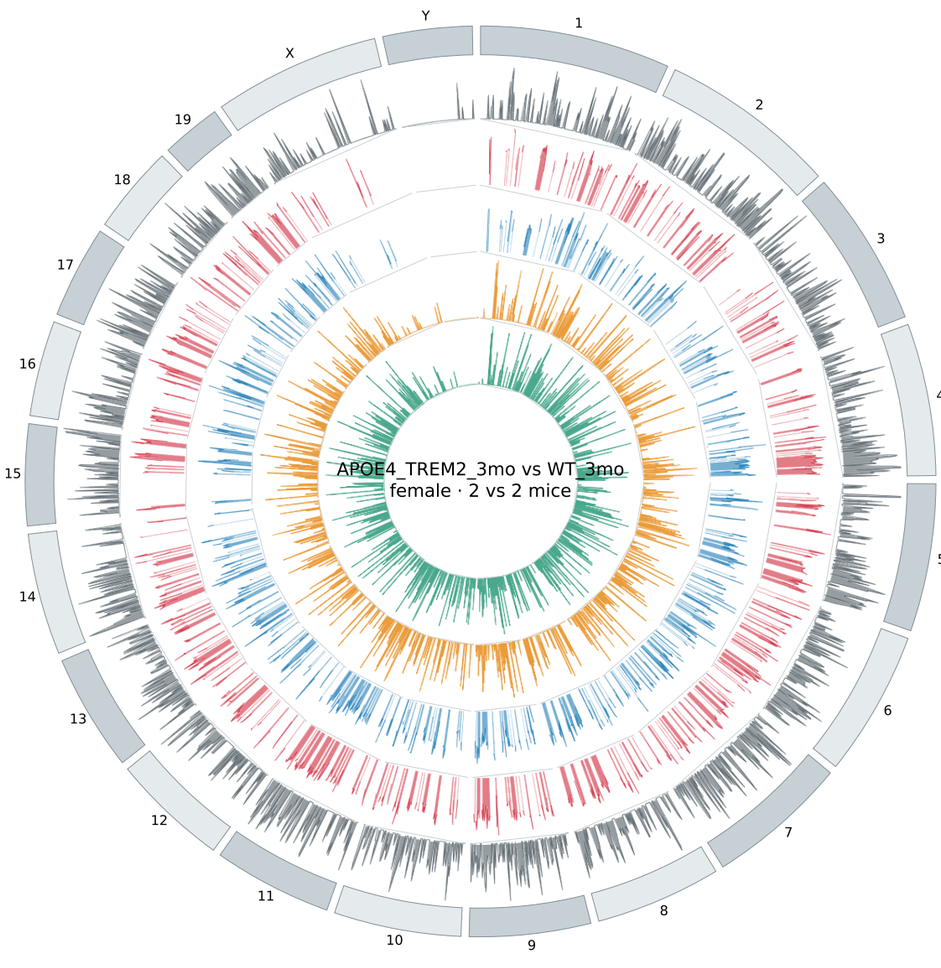

5xFAD_3mo · female

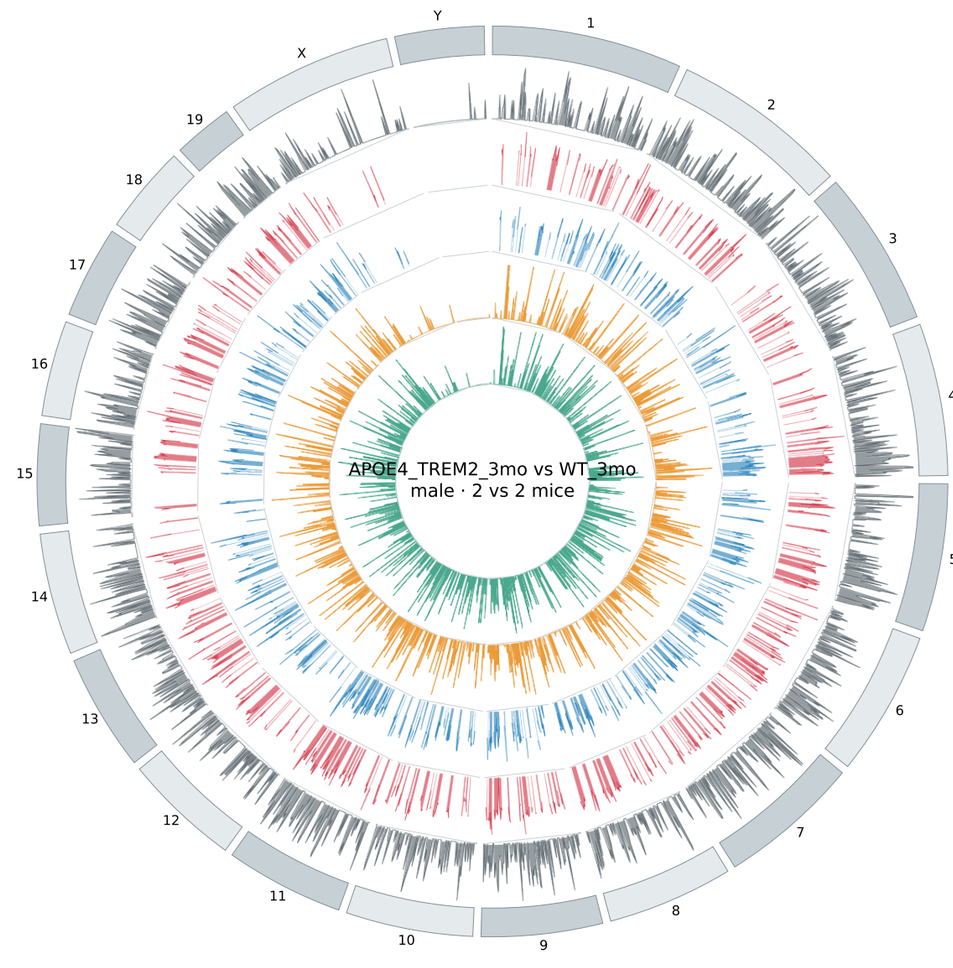

5xFAD_3mo · male

APOE4_TREM2_3mo · female

APOE4_TREM2_3mo · male

Outer → inner: selected TE copies per 1 Mb (grey); target and WT_3mo mean TE-body ATAC (red, blue); target and WT_3mo IRescue TE RNA (orange, green).

Same TE-copy set within each target comparison. RNA: expected UMIs per million matched gene UMIs. ATAC: TE-body bigWig signal / track genome mean. Equal mouse means by sex.

All tracks log1p-scaled with assay-wide 99th-percentile display cap. Sparse bins may show no selected copies. WT_21mo_female_1 excluded only for WT21; target female n=1.
