Embryonic forebrain H3K9me2 at TE-bearing ATAC loci (context only)

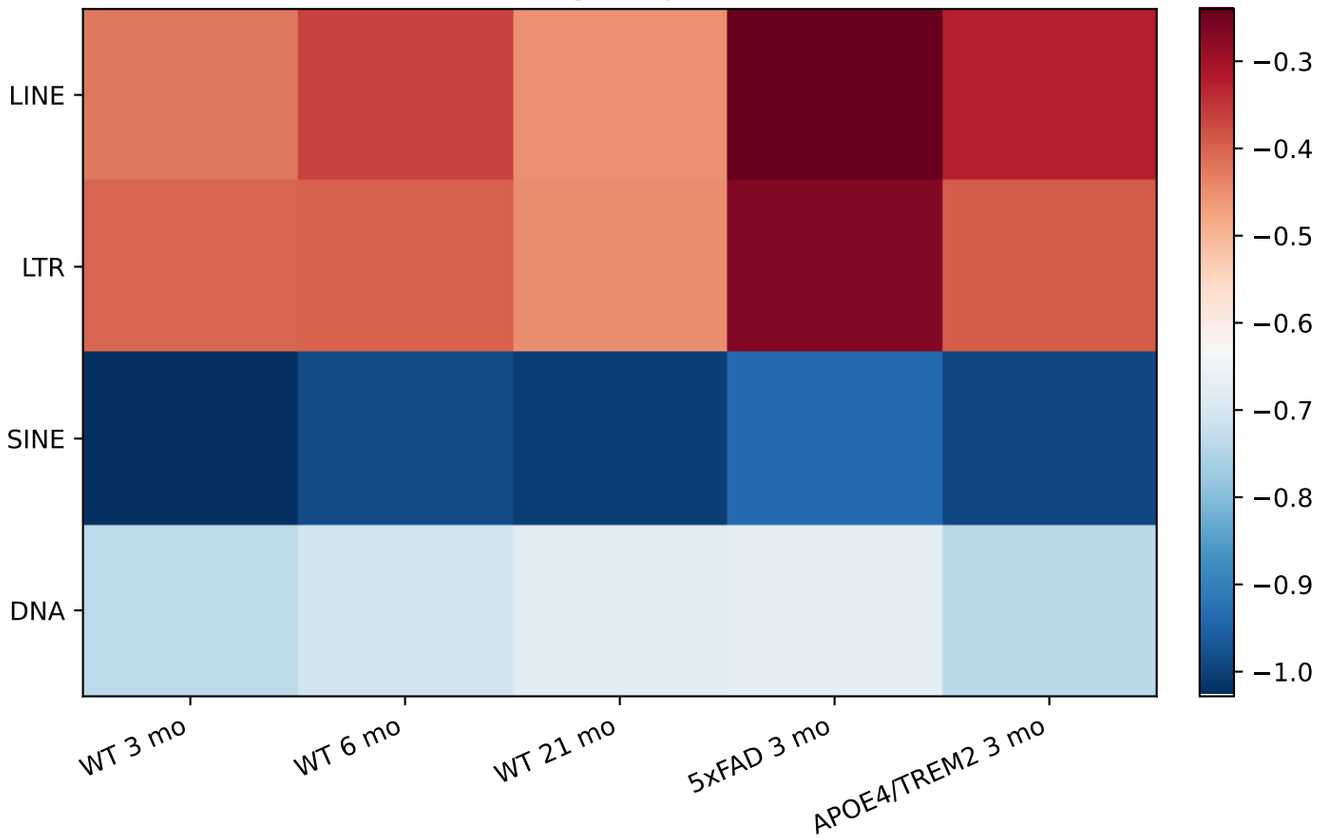

TE copies in each called-peak set

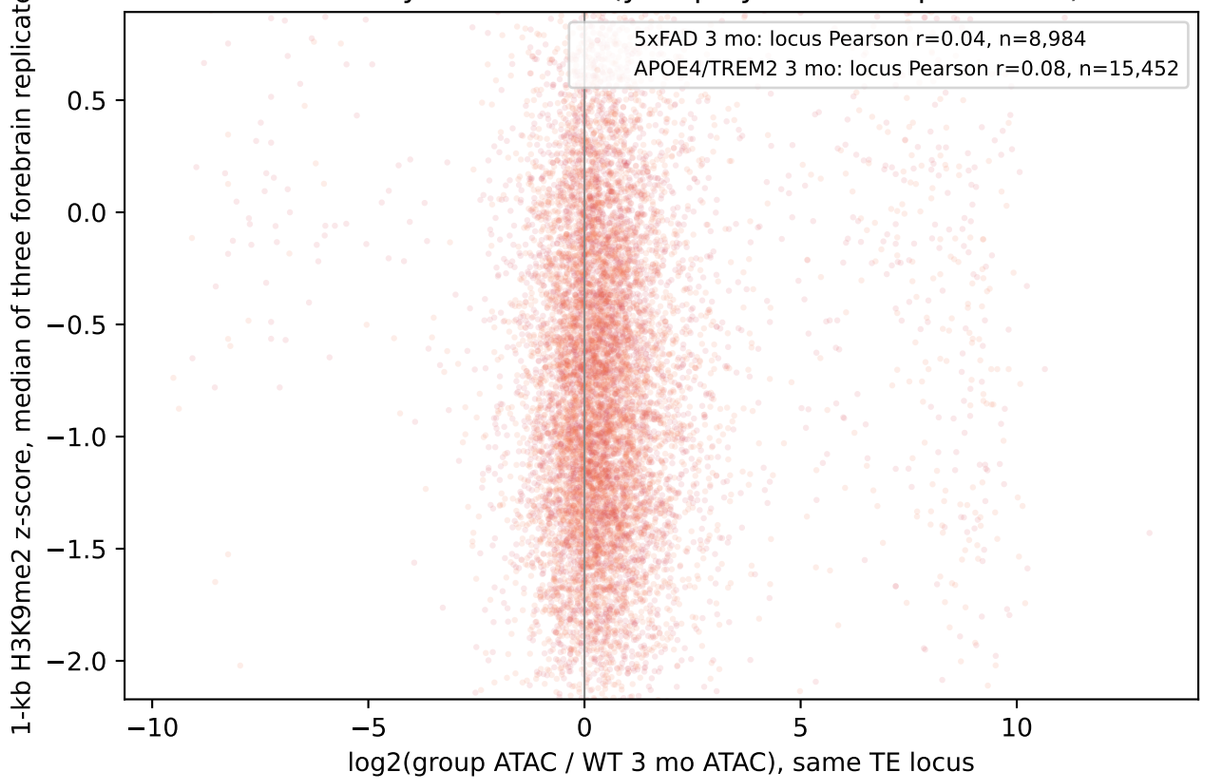

Locus-level distribution (display: 1st–99th percentile)

Median signal by TE class

Cross-study association (y display: 1st–99th percentile)

Embryonic forebrain is not Microglia. These values cannot measure Microglia H3K9me2 loss.
Peak absent in WT means no called WT peak, not zero WT reads. Loci can belong to multiple target sets.
